The Nick Williams Collection 2014

Rustic Cottages

A Rustic Way...

For some real fun, check out these new cottages added to the Nick Williams Collection—a playful design that can add color and life to your landscape while doubling as a storage or garden shed, playhouse, sauna, or even a guest cottage.

(Show Bradley images etc) These images are from a current project that Nick is working on out in Palmdale. Nick did the original landscaping on the property (you will see this soon on our online garden tour “A Safari in Palmdale”) and just recently finished a new outdoor kitchen and BBQ area. Now this new addition of a community of 3 cottages (one as a bathroom and the other two as sleeping cottages) He is designing the surrounding landscape with wonderful trees, other plantings, a bridge, ponds and much more...Watch our Website for this next phase.

Some ideas for these whimsical cottages

- **Guest Cottages**-Looking for extra space when company is visiting? A guest cottage is a perfect addition and we're offering some wonderfully new designs.
 - **Storage or Garden sheds** -The perfect solution for regaining control over your yard and garage! Sheds are used to store home and garden tools and equipment such as push lawn mowers, and gardening supplies. In addition, sheds can be used to store items or products that are not suitable for indoor storage, such as gas, pesticides or herbicides. There are many different uses for a garden shed or storage shed.
 - **Play houses**-The perfect back yard addition for your kids! It's like giving them a fun little environment to call their own!
- Saunas**-First and foremost, saunas and steambaths should be viewed as leisure products. They provide a relaxing and enjoyable environment to help you kick back and unwind. A place to find peace of mind, relaxation and contentment. In other words, a way to deal with daily stress with a smile on your face and a spring in your step.
